ENGINES

Complete Engines

Include fuel pump, injectors, injector pipes, timing assembly and bell housing. Complete engines are tested prior to despatch. Once tested the flywheel and manifolds are removed and the engine is packed without these parts. Outer timing covers, pulleys, manifolds, flywheel and turbo charger are not included.

Turnkey Engines

Supplied as above, with the addition of manifolds, turbo charger, turbo oil feed and return pipes, outer timing cover, crankshaft damper, water pump, thermostat and housing and glow plugs.

Stripped Engines

Include sump, block, cylinder head, rocker cover, inner timing cover, camshaft and crankshaft gear.

Short Engines

Consist of block, crank, con-rods and pistons only.

Re-conditioned Engines

These engines have been through the following rigorous processes:

- > Complete strip down
- > Removal of all core plugs
- > Thorough cleaning in environmentally-friendly, solvent-free washing machines
- > Removal of all parts subject to wear
- > Inspection of casings for signs of damage and corrosion
- > Crack-testing of camshafts before and after re-grinding
- > Re-boring of blocks and machining of decks to the correct surface finishes
- > Fitting of perfectly-balanced, machined con-rods in accordance with manufacturers recommended piston protrusions
- > Meticulous re-building of engines in individual, contaminant-free workstations
- > Renewal of all bearings and gaskets throughout the engine
- > Renewal/overhaul of oil pumps
- > Replacement of all core plugs
- > Dyno-testing of complete engines
- > Final inspection
- > Wrapping in cellophane and fitting into rigid, steel transportation frames
